RETENTION / A COHORT CALCULATION

What is one more repeat customer worth?

Start with a customer cohort. Then separate the observed repeat rate from the change you want to explore.

Put numbers to it.

First-time buyers in the cohort

1200

Buyers with a second order

252

Observation window, days

21%
Observed 90-day repeat rate

25%
Explored scenario

From rate to customers

252 of 1,200 customers returned within 90 days.

Scenario change

Value

Change the cohort, contribution and cost assumptions. Export a scenario you can review.
